

IT'S THE LAW! BUSINESS RECYCLING

THESE ITEMS ARE RECYCLABLE AND SHOULD BE PLACED IN YOUR WHITE RECYCLE BIN OR RECYCLE CART.

PAPER

- Magazines
- Phone Books
- Newspaper
- Cardboard [Flattened]
- Milk or Juice Cartons

METAL

- Aluminum Cans
- Tin Cans

GLASS

- Bottles and Jars

PLASTICS

- Drink Bottles
- Detergent Containers
- Plastic Toys
- Milk Containers

other services

BULKY ITEMS, ELECTRONIC WASTE, & WHITE GOODS

Items that cannot properly fit in your container, such as a chair or desk, are considered bulky items and require a special pick up. Electronic waste [e-Waste] is anything with a circuit board or battery, such as computers, telephones and small printers. White goods [e.g. refrigerators, freezers] and electronic waste cannot be disposed of in your container. CR&R will collect and properly recycle these items. For pricing, please call customer service.

HAZARDOUS WASTE/BATTERIES

Hazardous wastes are products that are flammable, corrosive, reactive, or toxic. This includes batteries of all types, as they are considered hazardous waste in California when they are discarded. Therefore, it is illegal to dispose of them in regular trash or recycling; so don't place them in CR&R containers. This includes batteries of all types and sizes Alkaline (AAA, AA, C, D, 9 Volt), Lithium (button cell, power tool batteries, camera batteries, other electronics), Ni Cad (power tools), and other battery types both rechargeable and single use. Batteries must be taken to one of the following:

- household hazardous waste disposal facility
- universal waste handler
- local retailer (Home Depot, Lowes, Best Buy, Staples, Ikea, etc.)

Why is this important? When lithium batteries are improperly disposed of they can cause fires in recycling centers, landfills, and garbage and recycling trucks.

For additional information <http://www.oilandfills.com/hazardous/bus> or <https://www.calrecycle.ca.gov/reducewaste/batteries>.

EXAMPLES OF HHW INCLUDE:

- Fluorescent Light Tubes
- Household Batteries
- Latex or Water Based Paint
- Non empty Aerosol Cans
- Thermostats
- High Intensity Discharge Lamps

You may use one of the County of Orange Household Hazardous Waste (HHW) drop off centers to properly dispose of any HHW.

For hours of operation or more information on Household Hazardous Waste centers and landfills, contact the County of Orange at 714.834.6752 or www.oilandfills.com.

SAVINGS

Recycling is not only good for the environment, it can be great for your bottom line too! By exchanging a trash container with a recycle container, your monthly bill may be significantly reduced. Let us show you how to better manage your waste stream and put money back in your business and not in your trash container.

GETTING STARTED

CR&R will work with your business to determine the types of materials you generate and structure a program using the space you have available in and around your office for collection.

TRAINING / ASSISTANCE

Once your business decides to implement a program, CR&R's Sustainability Specialist will assist in the training of your employees. We'll provide educational materials explaining the program in depth. One of the keys to a successful program is education, from the executive management to the janitorial staff.

CUSTOMIZED PROGRAMS

CR&R offers waste audits for businesses seeking to improve their current recycling and waste programs. A CR&R Sustainability Specialist will evaluate your waste stream from the inside out to achieve the most successful recycling program possible. For additional information, please call customer service.

RECYCLING LEGISLATION

Assembly Bill 939 [AB 939]
required jurisdictions to meet diversion goals of 25% by 1995 and 50% by the year 2000.

Assembly Bill 341 [AB 341]
requires all jurisdictions to meet the diversion goal of 75% by 2020 resulting in businesses that generate 4 or more cubic yards of waste to either:

- Participate in a recycling program with their local waste hauler.
- Donate, sell and/or self-haul materials to a recycling facility.

Information about California's business recycling requirements is available from CalRecycle at <https://calrecycle.ca.gov/recycle/commercial>

Assembly Bill 1826 [AB 1826]
requires businesses to separate their food scraps and green waste for recycling. AB 1826 builds on the success of the mandatory commercial recycling program established by AB 341. All businesses with 4 or more yards of solid waste per week must either:

- Participate in a recycling program with their local waste hauler.
- Donate, sell and/or self-haul materials to an organic recycling facility.
- Compost organic materials

Information about organic waste recycling requirements is available from CalRecycle at <https://calrecycle.ca.gov/recycle/commercial/organics>.

Senate Bill 1383 [SB 1383]
In September 2016, Governor Brown signed SB 1383 establishing methane emissions reduction targets in a statewide effort to reduce emissions. In accordance to this law, all local jurisdictions must provide organic waste collection services to all residential and commercial generators by January 1, 2022, to divert this material from local landfills. Organic waste includes food scraps and green waste such as landscape and pruning waste.

FOOD SCRAP RECYCLING

Returning organic materials to the soil drastically reduces the environmental impacts of landfills, reduces greenhouse gases, creates jobs, and helps sustain California's agricultural industry.

CR&R has developed a Food Scrap Recycling collection program to service businesses and gives you the opportunity to comply with State law. Items that will be acceptable in the program include food preparation scraps and table scraps, food soiled paper, plants, flowers, coffee grounds, and much more. To obtain additional information, call CR&R Environmental Services and ask to speak with a Sustainability Specialist for your area.

Have excess food to donate?

If you are interested in donating prepared or nonperishable food, contact one of CR&R's Food Rescue Partners: Waste Not OC Coalition at www.wastenotoc.org.

RECYCLE PROGRAMS

1 MIXED RECYCLING
This program recycles materials such as: cardboard, mixed paper, plastic, aluminum and glass bottles. They may be mixed together and placed in a recycling bin.

2 SOURCE SEPARATED RECYCLING
Your business may generate a large amount of one type of recyclable material, such as cardboard. CR&R can help you determine the best container for your needs based on the quantity and type of material.

3 CONSTRUCTION AND DEMOLITION
With construction and demolition [C&D] debris making up a large percentage of all material entering California landfills, CR&R can help you to divert as much as possible through a combination of source separation and mixed processing. Prior to starting your project, contact CR&R to find out what options will work best for your site. Planning ahead will assist you in diverting as much material as possible, as cost effectively as possible.

4 LEED PROGRAM
LEED, or Leadership in Energy and Environmental Design, is an internationally recognized green building certification system. CR&R is prepared to help you meet your construction based LEED goals. We are flexible enough to work with you on all building types—commercial as well as residential.

Low cost in-office recycling containers are available for your purchase to assist with segregating trash and recycling before going to a central recycling location. For additional information please contact us and request to speak with a Sustainability Coordinator.

Did you know...

California produces nearly half of the nation's fruits and vegetables, yet **1 in 7 Californians currently struggle with food insecurity?** "Food Insecurity" is the occasional or constant lack of access to the food one needs for a healthy, active life. CR&R is supporting efforts to keep edible food out of the recycle stream.
